

TKBTC FREE WIFI

On 17 August 2022 TKBTC resolved a Smart Town's "Free Wi-Fi Scheme for the Towyn and Kinmel Bay area" as minutes record. In the event residents paid part funding for a pilot scheme. <https://www.hwbmenter.cymru/en/smart-towns>

The grant funding justification for Smart Town Wi-Fi is focussed on Town Centres and enables passersby in those specific public places to browse and receive information on the place: (i.e. college, stadium, industrial estate, shopping complex). Footfall is measured on how many visit or pass a specific place, data below is for the Square.

CCBC have worked hard and skilfully on this project which is commercially important in the Smart Town context. There are many commercial uses for footfall data but is this something our residents should or would want to pay for? Smart Towns Wi-Fi is not going to provide free Wi-Fi to residential areas. Wi-Fi in TKB is supplied at cost for multiple device high speed connections at home.

Kind regards,

Barry
