

Id	Do you support the installation of the proposed LED Solar street lights in this area?	What are your main reasons for supporting or opposing this project	Are there any specific locations where you feel lighting is most needed?	Do you have any concerns (e.g. light pollution, maintenance, aesthetics)?	Do you currently feel safe using this area during the evening or at night?	Would additional lighting make you feel safer in this area?
1	Yes	Much needed lighting	All across the estate	Upkeep	No	Yes
2	Yes	Environmental concern	No	No	Maybe	Yes
3	Yes	I like the fact they are environmentally friendly and they light up the area where I live.	No	No	Yes	No
4	Yes	Need more light	Most places specially were it's dark area	No	Maybe	Yes
5	Yes	Not enough street lights at present	Wodside Avenue only have 2 lights	No	No	Yes
6	Yes	Very dark and dangerous at the bottom of our avenue no lighting at all.	At the bottom end of the avenue outside nolumber 19-21	No	No	Yes
7	Yes	To make it safer for all	Woodside Avenue leading directly down to the beach along with lightening at the start of every road	N\A	No	Yes
8	Yes	Lighting very poor	Around the green	No	No	Yes
9	Yes	I have a small dog, which I take out each night. The Promenade is very dark and very spooky.	Certainly on the Promenade and the light must be able to shine onto the grassy area Infront of the Promenade.	My only concern is the winter period would it be as effective as the summer and for how long as the nights are a very long period.	No	Yes
10	No	The lighting we have is perfectly fine & the probability of disruption of replacing the perfectly good lighting we already have is pointless	No	No	Yes	No
11	Yes	The pot holes in the estate are treacherous and many areas have no lighting making navigation difficult	Clwyd Gardens.	Maintenance must be forthcoming without a long wait if they fail	No	Yes
12	Yes	All for renewables	Just wear it is now	So long as they look like normal lights	Yes	No
13	Yes	Any additional lighting will assist the local people in avoiding the pot holes we are plagued with, make people feel safer especially the elderly and enhance the ambience of the estate	Any area devoid of existing lights..	Pollution will be minimal, as they are solar they will help the environment, maintenance would have to be ongoing but this already applies to the existing lights	Yes	Yes
14	Yes	For better lighting and security	Not really	No	Yes	Yes
15	Yes	Green energy, Saftey for later night walks with dog	Towards the beach	Towards the beach are burrows from the local rabbits and foxes spotted nearby. Wildlife and habitats must not be disturbed. Light pollution can not only damage the beauty and attractions of this place but also endanger our prey wildlife as their evolved camouflage and hiding tactics are now nullified.	Maybe	Yes
16	Yes	When walking home on the dark it will help us see	Maybe the small road between Woodside Avenue to Arnold gardens.	Yes. I think they need to go with area and not imping on anyone's home. For example light pollution that goes into someone's home	Yes	Yes
17	Yes	More lighting in poorly lit areas with minimal disruption	Two that you propose for Rhys Avenue have street lights next to them? You need to re look at the ones outside 22 & 21 Rhys Avenue. They are need on the circle near number 11 to light that corner as extremely dark Additionally any chance these can be put along the prom from the circle to Asda mainly for dog walkers in the winter as pitch black & dangerous with cyclists	No	Yes	No
18	Yes	Renewable energy	Not sure, I'm not out after dark on these roads	No	No	Yes
19	Yes	I support this as it is solar powered	I don't understand the current proposed locations on the Circle and Rhys Avenue as there are already street lights there. A solar powered one halfway down the circle would be better placed than yhe one half way between Rhys Avenue and Glascoed Avenue. Who came up with these locations? Along the promenade would be more beneficial as this is too dark at night	None as we already have street lights at the back, side and front of our house	Maybe	Yes
