Tir Prince park - Biodiversity scheme site plans From:

philip.vipond@conwy.gov.uk

Following site visits to Tir Prince Park in the early and latter stages of the scheme, working with our selected Landscape Architects (Land Studio), we have now applied the desired outcomes to the biodiversity improvements plan for habitats within the park which also further supports section 6 of the Environmental (Wales) Act and will contribute to the CCBC carbon sequestration reduction targets. There are many positive outcomes from this scheme.

Whilst the scheme will improve wildlife and habitat opportunities, we have been careful to design this with public integration and continued use of the designated areas in mind that have been incorporated within the scheme for those wishing to gain more insight and to have the ability to do so along with information panels at strategic points to further provide an understanding to its purpose.

The scheme reflects the current landscape topography whilst increasing opportunities for larger colonisation of birds, bees, insects and amphibians within the natural environment of the park in a way that will not alter the visible landscape.

We have spoken with specialist landscape contractors on the creation of the 'Pond Scapes' which are shallow scrapes along with supplementary planting to support the scheme and we have 'windows of opportunity' and Local Partnership for Nature funding to commence works over the coming months with a completion date by March 2025.

We would be very grateful if you will share this email and the attachments of the design plans with the Local Members and interested parties please to illustrate our proposals.

We will as always be happy to answer any questions and trust this collectively meets with the future vision for the park, its communities and importantly its wildlife.

Many thanks and kind regards.

Phil
